

Modifying a pie chart

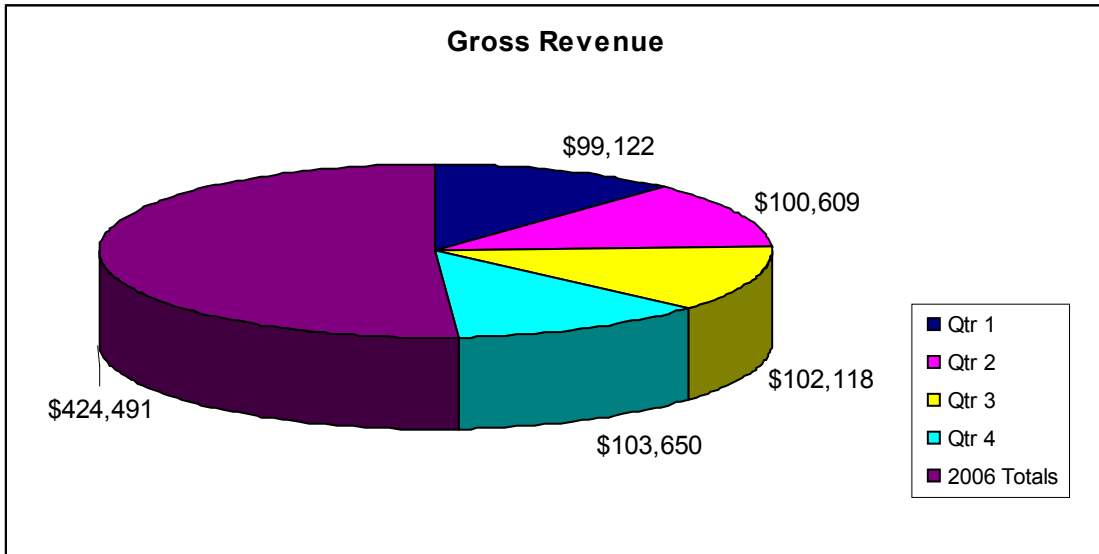

Microsoft Excel 2003

When you wish to highlight data, this tip may be useful.

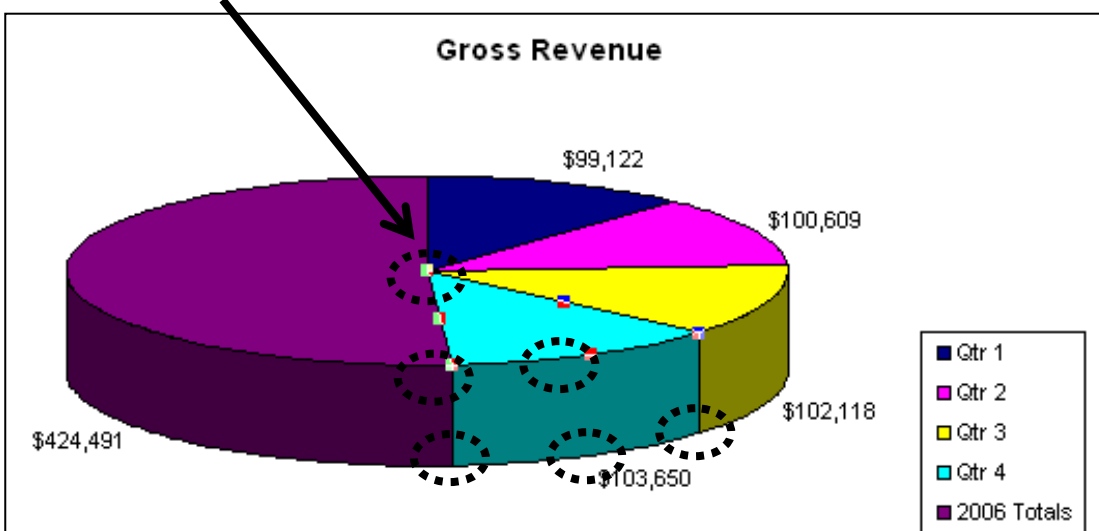

Sample data:

	Qtr 1	Qtr 2	Qtr 3	Qtr 4	2006 Totals
Gross Revenue	\$99,122	\$100,609	\$102,118	\$103,650	\$424,491

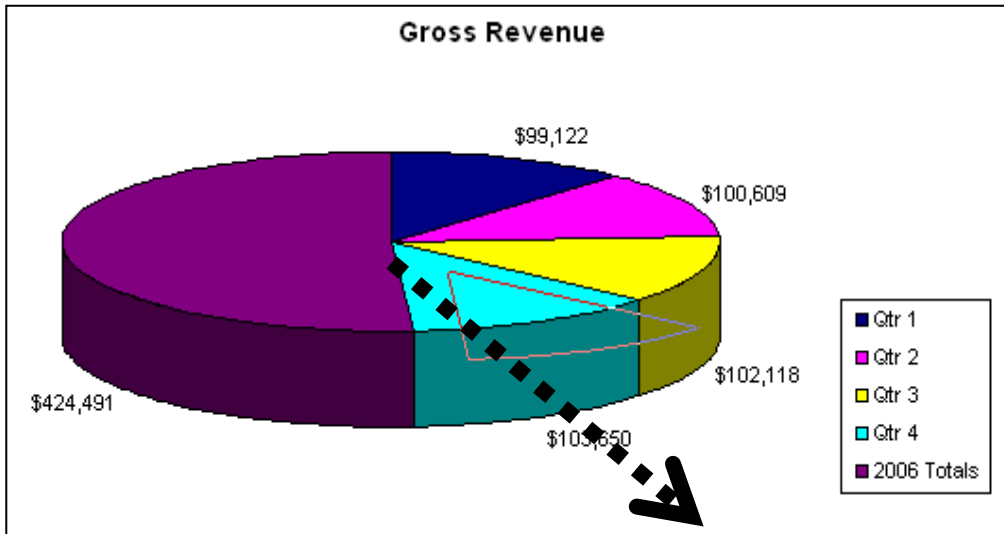

1. Create a pie chart based on the sample data above.

2. Select a slice of the chart that you wish to pull out. e.g.) 'Qtr 4, \$103,650'
(The square dots will appear around the slice, when it is ready to be pulled out.)

3. Drag the piece of the chart out.

4. Done.
