Modifying a pie chart

Microsoft Excel 2007

This is useful if you have a data series that you wish to make stand out.
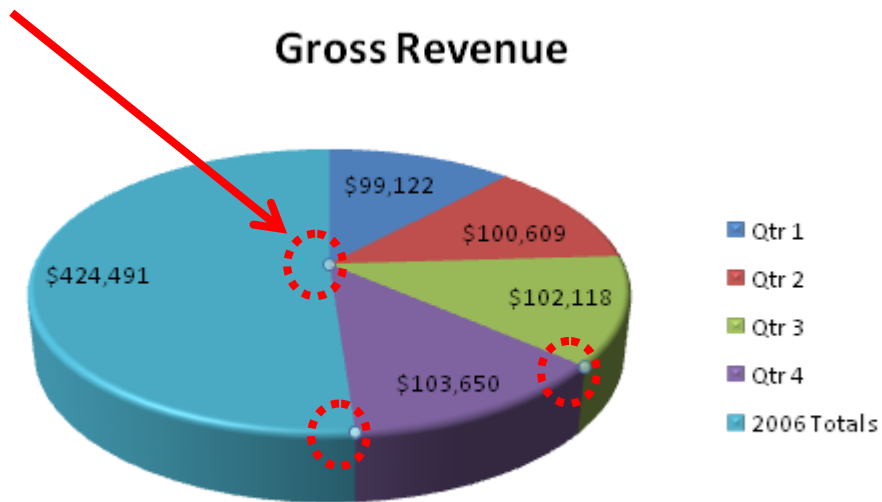

Sample data:

|	Qtr 1	Qtr 2	Qtr 3	Qtr 4	2006 Totals
Gross Revenue	$99,122	$100,609	$102,118	$103,650	$424,491

1. Create a pie chart based on the sample data above.

2. Select a slice of the chart that you wish to pull out. e.g.) 'Qtr 4, $103,650'
   (The round dots will appear around the slice, when it is ready to be pulled out.)

3. Drag the piece of the chart out.

4. Done.
