# Sort 1 column

1. Click any cell > Click on Sort & Filter > Sort A to Z or Sort Z to A button

	А
1	Elephant
2	Monkey
3	Chicken
4	Horse
5	Bird

2. Sorted (e.g., Ascending order)

	А
1	Bird
2	Chicken
3	Elephant
4	Horse
5	Monkey

# Sort by 1 column

You have multiple columns and wish to sort by a particular column.

1. Select any cell in the column that you wish to sort by

	А	В	С
1	Elephant	10	Banana
2	Monkey	52	Apple
3	Chicken	1978	Orange
4	Horse	823	Lemon
5	Bird	1	Kiwi Fruit
6			

2. Click on Sort & Filter > Sort A to Z or Sort Z to A button.

А	В	С
Bird	1	Kiwi Fruit
Chicken	1978	Orange
Elephant	10	Banana
Horse	823	Lemon
Monkey	52	Apple
	Chicken Elephant Horse	Bird 1 Chicken 1978 Elephant 10 Horse 823

		А	В	С	
	1	Elephant	10	Banana	
	2	Monkey	52	Apple	
	3	Chicken	1978	Orange	
	4	Horse	823	Lemon	
	5	Bird	1	Kiwi Fruit	
	6				

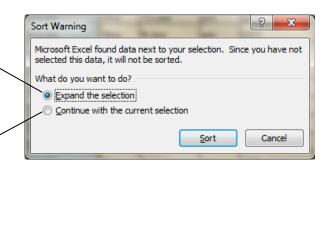

#### Tip: WARNING!

Be careful when you perform sorting. DO NOT highlight the whole column when sorting. Otherwise, your data can get mixed up easily. The Sort Warning message comes up when you highlight the column. Read the message carefully, or click Cancel to start again.

This option enables you to do the same sorting as above.

This option sorts one single column only and ignores the rest of the data, i.e., when you have multiple columns next to each other, non-highlighted columns will stay as they are. Only the data in the highlighted column will be sorted. After sorting, the other corresponding row data won't be sorted so your data would become incorrect information.

When you select the entire column, you are defining the area to be sorted. It is not to be used as sort by.

When you highlight the entire column and sort it, your sorting result is as below. For instance, column C was highlighted and was sorted ascending order.

Sef	ore sor	rting		
	A	В	С	D

## The Last Name column is sorted in alphabetical order.

#### Troubleshooting

Massey University

When your mouse cursor was in an empty cell, and was outside of the data area, the following error message will appear. You cannot perform sorting.

Microsoft	't Excel
	The command could not be completed by using the range specified. Select a single cell within the range and try the command again.
	ОК

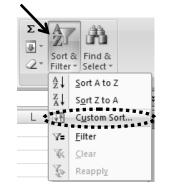

### Sort by 2 or more columns

You can specify as many columns as required

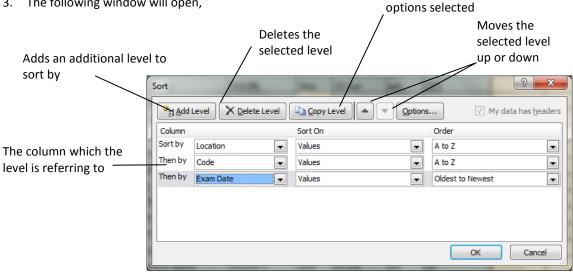

1. Click any data that you wish to sort by a few columns

	A	В	С	D
1	Custld	Firstname	Lastname	Address
2	113	Nora	Albert	193 La Jolla
3	104	Yvonne	Anders	01 E Orange
4	116	H. R.	Baker	331 Harbor Se
5	131	Chris	Butler	87 White Street
6	135	Alexander	Campbell	5988 Accountant Way
7	152	Wendy	Campbell	12397 Plaines Lane

2. Sort & Filter > Custom Sort...

The following window will open, 3.

Makes a copy of the selected level and the

4. Click the **OK** button. Your data will be sorted accordingly.
