

## **Videos**

Several video / movie file formats work including AVI, MPG, MPEG, WMV and others.

- 1. Select the slide that you wish to insert a movie onto
- 2. Insert > Video > Video from file

3. Browse to your movie file >Select it > Click **OK** 

4. Done.

## Changing the video start mode

- 1. Select the video
- 2. Click on Playback
- 3. Click on the start drop box
- 4. Choose from Automatically or On Click

Depending on whether you chose **Automatically** or **when clicked**, your movie clip will either start playing straight away or when you click on the image.
